Neuroscientist and TV star Mayim Bialik on the status of women in STEM fields.

FEATURES

112 | CARVED BY LAVA

Centuries of eruptions have created hidden networks of caves under Hawaii's volcanoes. Below, lava flows out of one of the underground passageways into the sea. *By Joshua Foer, Photographs by Carsten Peter*

On the Cover A polygraph allows its operator to compare a person's physiological responses—such as changes in breathing, blood pressure, or pulse—when telling the truth versus lying. Originally introduced in 1921, these instruments may help indicate when people lie, but scientists are still exploring the question of why people lie. *National Geographic photo illustration*

30 | WHY WE LIE

In the age of social media, separating truth from lies may be harder than ever.

*By Yudhijit Bhattacharjee
Photographs by Dan Winters*

92 | TURNED TO STONE

A Canadian mine yields one of the world's best preserved dinosaurs.

*By Michael Greshko
Photographs by Robert Clark*

52 | LIFE IN THE BALANCE

Climate change threatens animals of the Galápagos.

*By Christopher Solomon
Photographs by Thomas P. Peschak*

106 | A STATE OF GRIEF

Death rituals have become a cathartic part of daily life in the Philippines.

*By Aurora Almendral
Photographs by Adam Dean*

70 | THE PERILS OF PALE

In Tanzania people with albinism are attacked for their body parts.

By Susan Ager, Photographs by Stephanie Sinclair

128 | THE SIDE EFFECT

Entrepreneurs sell medicine on Haiti's streets.

*By Arnaud Robert
Photographs by Paolo Woods and Gabriele Galimberti*

ELSEWHERE

TELEVISION

IMAGINING WHAT LIFE WILL BE LIKE IN YEAR MILLION

If we're just in the infancy of technologies such as virtual reality and artificial intelligence, what will the future bring? Perhaps a metaverse (right), where one person's mind creates a simulated world that others also inhabit. It's one of the futuristic visions explored in the six-part global miniseries *Year Million*, airing Mondays at 9/8c starting May 15 on National Geographic.

TELEVISION

BREAKTHROUGH DELVES INTO DISCOVERIES

The series *Breakthrough* follows scientists whose work—on cancer cures, cybersecurity, drones, and more—could change the world. It also looks at the discoveries' social, ethical, and economic implications. Episodes air Tuesdays through June 6, at 10/9c on National Geographic.

NAT GEO WILD

MAN VS. OCTOPUS: WHO HAS THE EDGE?

The octopus, one of Earth's most intelligent invertebrates, can grow as large as a hundred pounds and have a 16-foot arm span. See how an octopus compares—in strategy, strength, and more—when pitted against a human. The face-off airs June 4 at 9/8c on Nat Geo WILD.

BOOKS

ANIMAL PARENTING TO WARM THE HEART

Two books full of inspiring stories and portraits of animal families are the perfect way to celebrate Mother's Day and Father's Day. *The Wisdom of Moms: Love and Lessons From the Animal Kingdom* and *Amazing Dads: Love and Lessons From the Animal Kingdom* are available wherever books are sold, and at shopng.com/books.
