Table of Contents

List of tables and figures	iv
List of acronyms	viii
Abstract	xi
Introduction	1
Sampling scheme and establishment profile of 2015 SIA	9
Survey objectives and survey plan	9
General information about the targeted firms	13
Innovation activity in Philippine business and industry	23
Effects and sources of innovation	36
Factors influencing and/or preventing innovation	47
Support for innovation	60
Summary, policy issues, and ways forward	69
Summary of findings	69
Implications for policy	70
Proposed legislative measures	76
Concluding remarks	77
Appendix	79
References	97
The Authors	100

List of tables, figures, and appendix

Table

1	Distribution of establishments in frame by industry and employment size	11
2	Distribution of sample establishments in frame by industry and employment size	11
3	Capital participation share across nationalities, by size of establishment and by major area	17
4	Female share to total employment, by industry and employment size	22
5	Key statistics on innovation activity by size of establishments	24
6	Key statistics on innovation activity by industry	26
7	Key statistics on innovation activity by area	29
8	Percentage of establishments that filed for Intellectual Property Rights (IPR), by innovation activity status	33
9	Proportion of innovation-active establishments that rate effects of product and process innovation as 'high', by major sector and size of firm	37
10	Percentage of organizational innovators that rate effects of organizational innovation as 'high' by major sector and size of firm	40
11	Proportion of MSMEs and large establishments rating information sources as 'high' importance, by size of establishment	42
12	Proportion of innovation active and collaborative firms by cooperation partners	45
13	Percentage of SMEs and large establishments that regarded potential barriers to innovation as "high" among innovators and noninnovators	49
14	Determinants of product innovation, process innovation, and innovation activity	50
15	Selected innovation statistics for panel establishments, by year	56
16	Frequency distribution of panel establishments by employment size in 2009 and 2015	56

17	Key innovation statistics for panel establishments, by industry	58
18	Change in proportion of establishments in 2009 and in 2015	58
19	Regression results on likely factors that explain innovative behavior among panel firms	59
20	Proportion of establishments that are aware of any government innovation policy or intervention and of which, were provided government support or assistance in innovation, by size and by industry	61
21	Percentage of MSMEs and large establishments that regarded the government-support programs they received as "highly important" for innovation—recipients of government support only	62
22	Proportion of registered establishments in investment promotion agencies (IPAs) that availed financial and other incentives since registration with any IPAs, by major sector and size of firm	65
23	Proportion of registered establishments in investment promotion agencies that availed financial and other incentives in 2015, by major sector and size of firm	67
24	Instruments for promoting relevant R&D in universities and greater commercialization of knowledge and interaction with enterprises	72

Figure

1	R&D expenditure among ASEAN member-states, as percentage of gross domestic product	3
2	Number of research scientists and engineers per million people	4
3	Innovation ecosystem in developing countries	8
4	Percentage distribution of establishments by size and legal organization	14
5	Percentage distribution of establishments by economic organization	15

6	Distribution of establishments by age and size	15
7	Percentage distribution of establishments by area and geographic market	16
8	Percentage of establishments that are franchises, by area	20
9	Percentage of franchised establishments, by industry and employment size	20
10	Share of employment in establishments by sex and area	21
11	Percentage of establishments that have employees with a postbaccalaureate degree, by employment size	22
12	Proportion of establishments that spent on various innovation-related activities by activity and by size of establishment	31
13	Proportion of establishments that are innovation-active by industry and by size of establishment	32
14	Proportion of organizational innovation among MSMEs and large establishments, by industry and organizational innovation status	34
15	Proportion of establishments across industry by size and marketing innovation status	34
16	Proportion of MSMEs and large establishments that undertook innovation activities as part of a procurement contract to provide goods or services to a public sector organization, by industry	35
17	Percentage of innovation-active MSMEs and large establishments with cooperation arrangements on innovation activities, by major industry	44
18	Cooperation partner found most valuable for innovation (innovation active, collaborative establishments only)	46
19	Proportion of MSMEs and large establishments across industry groups that abandoned innovation activities at the concept stage, after activity inception, or experiencing serious delays	47
20	Percentage of establishments that gave a "high" rating to potential reasons not to innovate, by size—noninnovators only	52

21	Proportion of MSMEs and large establishments with public financial support for innovation and proportion of MSMEs and large establishments with (national or local) government support to marketing innovation, by industry	60
22	Perception by MSMEs and large establishments on how government can encourage innovation	63
23	Proportion of MSMEs and large establishments by registration at an investment promotion agency	63
